Dear *Don,*

I want to take this opportunity to thank you personally for your participation on the Space Station Advisory Committee and for your enduring support of the Space Station program. As you may know, I'm retiring this week after 30 years of Federal service. It was a real pleasure for me to know you and to work with you during the activities of the committee.

As you may also know, senior NASA management has decided to change the structure and charter of the committee to better reflect the revised Space Station program. Therefore, the Space Station Advisory Committee is being disbanded.

Over the next weeks, the Office of Space Flight management will be considering individuals to serve on the new advisory committee. This consideration will include members that served on our committee, in addition to other individuals, in an effort to draw on talents that best meet the needs of the Space Station program. Those to be invited to serve will be hearing from NASA within the next several weeks.

If there are any questions, please feel free to contact John Watts, of the Space Station Program Office, at (202) 358-0101. Again, thanks for your support, and I wish you great success in future endeavors.

Sincerely,

Bill

William P. Raney
Executive Secretary
Space Station Advisory Committee
Office of Space Systems Development

and thanks for lunch - it was great!

William P. Raney 407-918-1411
